

Spatial Observation Information Technology

WCS Standardization & Reference Implementation

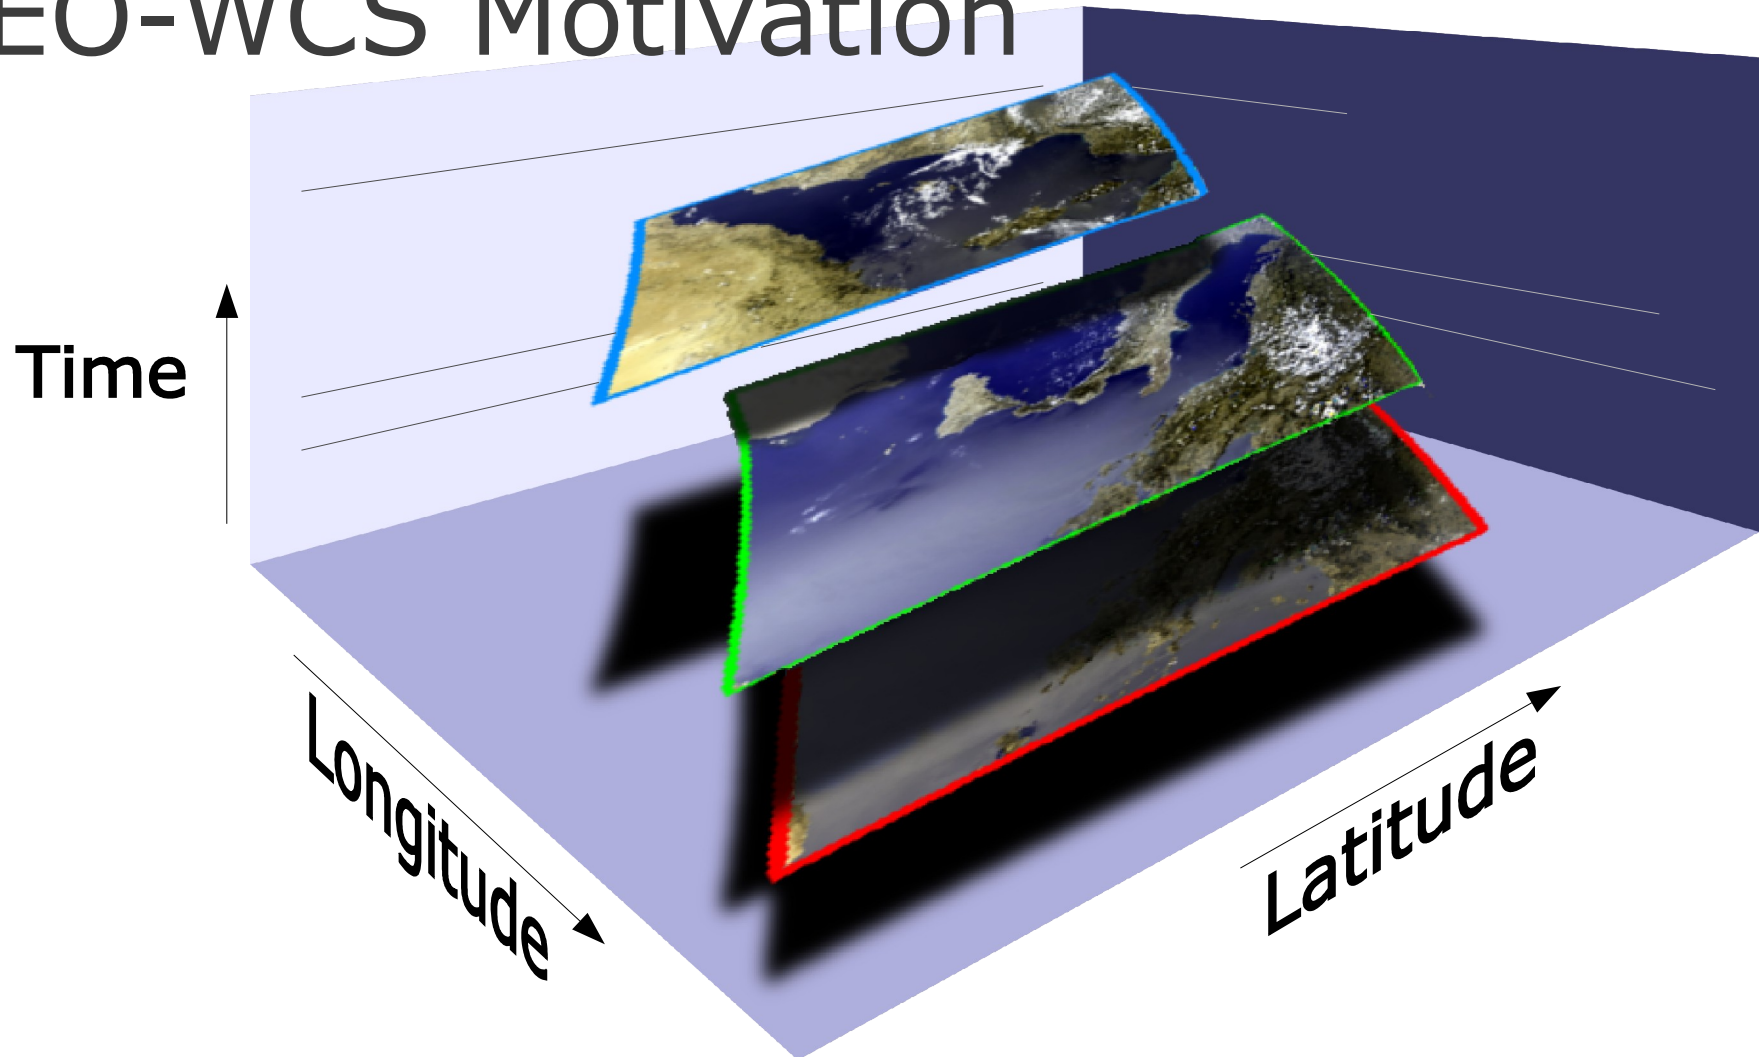

Stephan Meißl, EOX IT Services GmbH
stephan.meissl@eox.at

2012-02-15 HMA AWG Meeting

Outline

- EO Web Coverage Service (EO-WCS) Motivation
- WCS Standardization
 - Current Status
 - Ongoing Work
 - Future Work
- Reference Implementation
 - Integrated Usage of EO-WMS & EO-WCS
 - MapServer, EOxServer, etc.

EO-WCS Motivation

WCS – Current Status

- GMLCOV 1.0.0 – Approved
OGC 09-146r1, OGC GML 3.2.1 Application Schema – Coverages
- WCS 2.0.0 – Approved
OGC 09-110r3, OGC WCS 2.0 Interface Standard – Core
- KVP, XML/POST, and XML/SOAP protocol binding extensions 1.0.0 – Approved
OGC 09-147r1, OGC WCS 2.0 Interface Standard – KVP Protocol Binding Extension
OGC 09-148r1, OGC WCS 2.0 Interface Standard – XML/POST Protocol Binding Extension
OGC 09-149r1, OGC WCS 2.0 Interface Standard – XML/SOAP Protocol Binding Extension

WCS – Ongoing Work

- GMLCOV 1.0.1 – Submitted for 2-week voting
OGC 09-146r2, OGC GML 3.2.1 Application Schema – Coverages
 - Adopting three Conformance Classes:
 - *gml* – Pure GML encoding
 - *multipart* – GML header plus standard encoding
 - *special-format* – standard encoding only
 - Correcting *metadata* element used in EO-WCS
 - Various minor corrections like adjusting informative examples to adopted SWE Common standard

WCS – Ongoing Work

- WCS 2.0.1 – Submitted for 2-week voting
OGC 09-110r4, OGC WCS 2.0 Interface Standard – Core
 - Correcting *Extension* elements needed in EO-WCS
 - Adding *nativeFormat* to coverage description
 - Adding optional *format* and *mediaType* parameters to GetCoverage request; default is native format
 - Adding *CoverageSubtypeParent* to allow introducing new coverage types e.g. in EO-WCS
 - Various minor corrections and clarifications

WCS – Ongoing Work

- CRS Extension – Submitted to TC for public comment period
OGC 11-053, OGC WCS 2.0 CRS Extension
 - Adds optional *subsettingCrs* and *outputCrs* parameters to GetCoverage request; default is native CRS
 - Defines crs-gridded-coverage Conformance Class for RectifiedGridCoverages and ReferenceableGridCoverages used in EO-WCS

WCS – Ongoing Work

- KVP and XML/POST protocol binding extension corrigenda – Final editing for SWG vote
 - KVP: SWG discussion finished
 - XML/POST: Only editorial corrections necessary
- GeoTIFF, CF-netCDF, and JPEG2000 Encoding extensions – Drafts available
 - Need adoption of discussions
 - Need adjustments to latest WCS standards
- HDF Encoding extension – Editor invited

WCS – Ongoing Work

- EO-WCS 1.0.0 – Public comment period passed
OGC 10-140, OGC WCS 2.0 Application Profile - Earth Observation
 - One comment received
 - Adjustments to GMLCOV and WCS corrigenda
 - ready for voting

EO-WCS

- EO Coverages
 - Rectified- or Reference-ableGridCoverages plus EO Metadata (Acquisition time, Footprint, etc.)
- Dataset
- StitchedMosaic – Homogeneous grouping
- DatasetSeries – Heterogeneous grouping
- DescribeEOCoverageSet operation – Spatio-temporal search on metadata

WCS Future Work

- XML/SOAP protocol binding extension corrigendum
 - Experience from implementation in O3S
- WCS Transactional (WCS-T)
 - Experience from implementation in O3S
- Band subsetting, Scaling & Interpolation, WCS time handling, WCPS, etc.
- ReferenceableGridCoverages and other additional coverage types
 - First implementation available from O3S

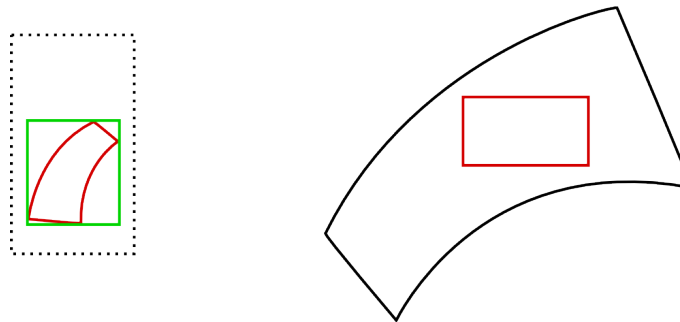

Use Case for Referenceable-GridCoverages

WMS GetMap
(georeferencing and
reprojecting using GCPs)

WCS GetCoverage
AOI subsetting

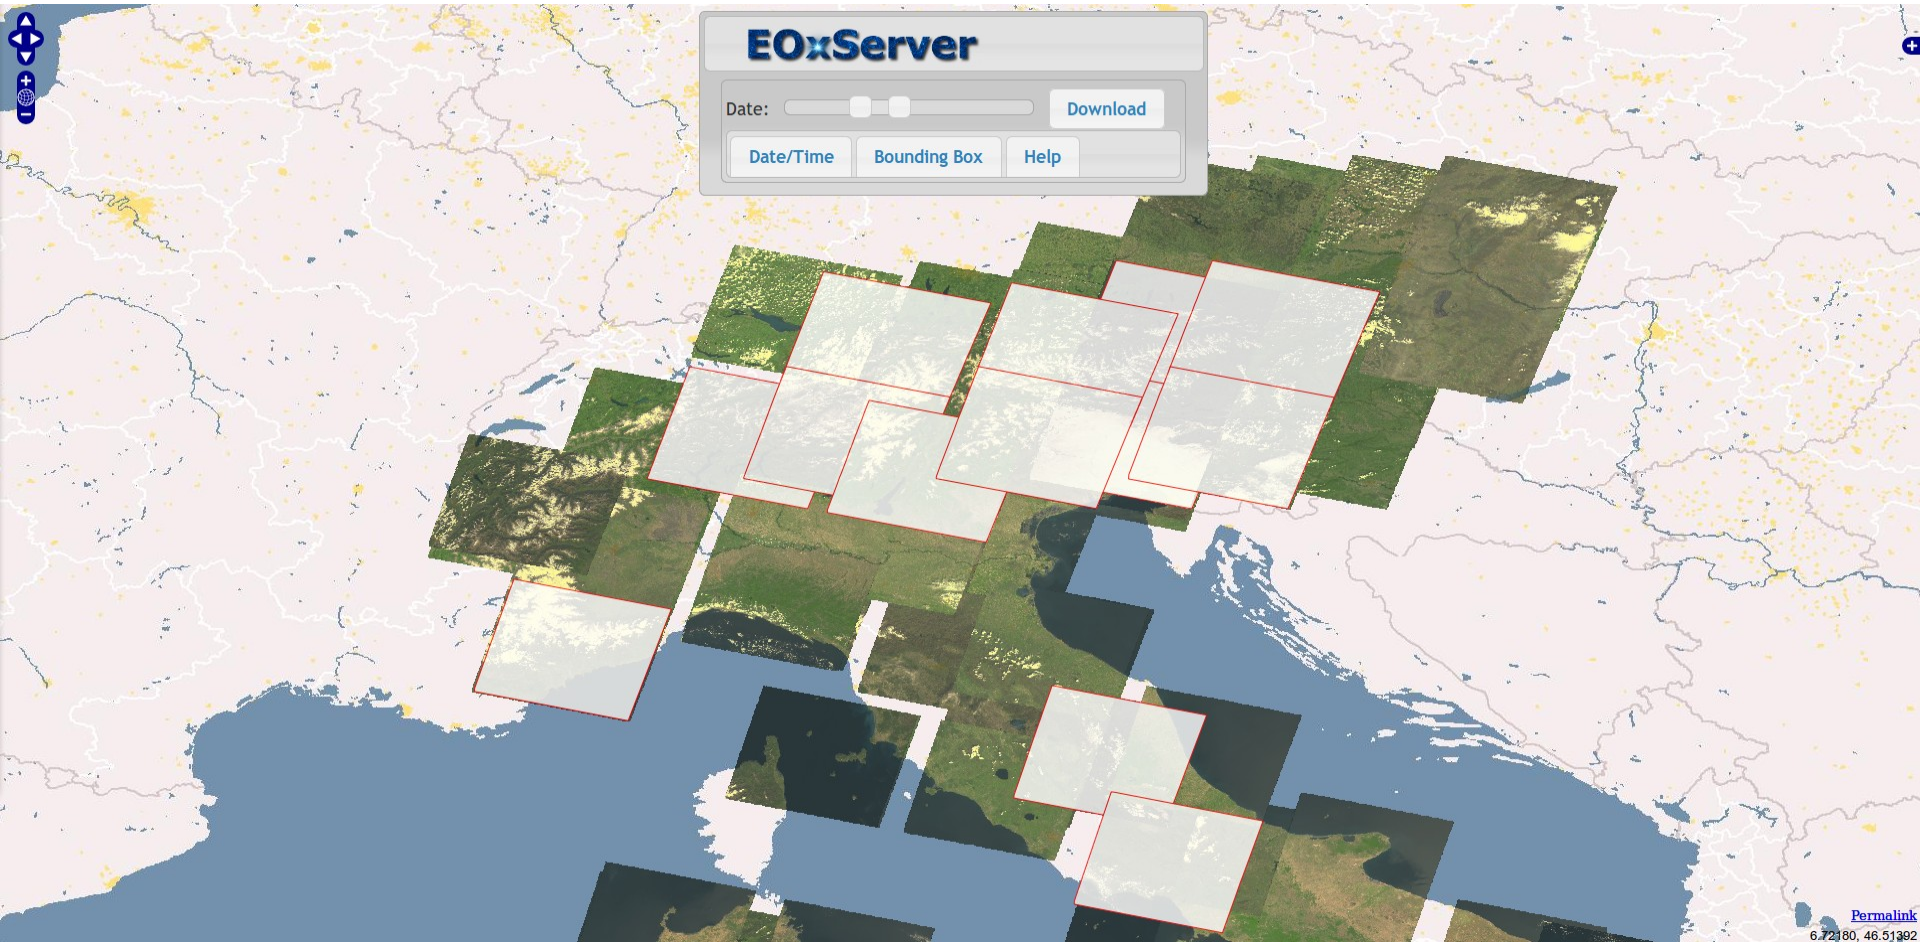

Bounding box subsetting

WCS GetCoverage response
* ReferenceableGridCoverage
or
* RectifiedgridCoverage
(georeferencing and
reprojecting using GCPs)

EO-W*S Client – Date Slider

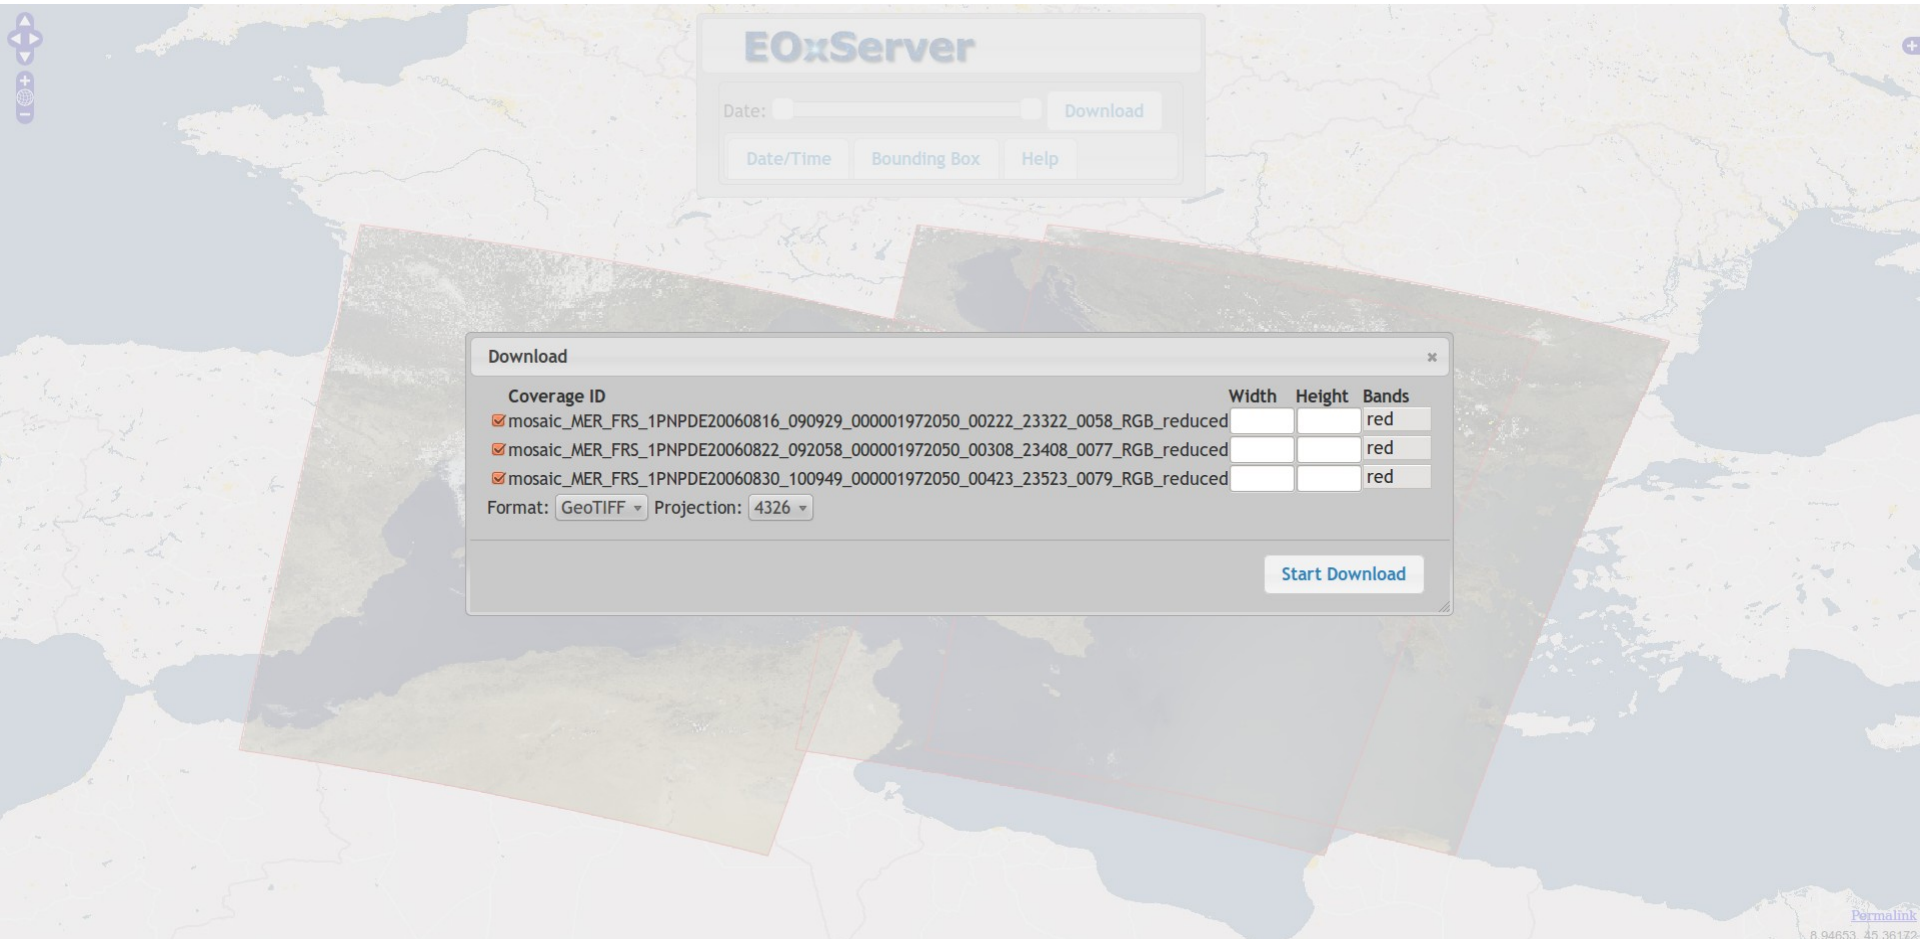

EO-W*S Client – Date Picker

EO-W*S Client – Bounding Box

EO-W*S Client – Download

EO-W*S Client – Download sub.

The screenshot displays the EOxServer web interface. On the left, a vertical sidebar shows three satellite image thumbnails. The top thumbnail is labeled '158 x 158 pixels 73.6 KB 100%' and '0 / 7'. The middle thumbnail is labeled '88 x 158 pixels 41.2 KB 100%' and '5 / 7'. The bottom thumbnail is labeled '186 x 158 pixels 86.6 KB 100%' and '6 / 7'. The main area shows a satellite map of Europe with a red bounding box and a green sub-region. A central dialog box titled 'EOxServer' contains the following controls:

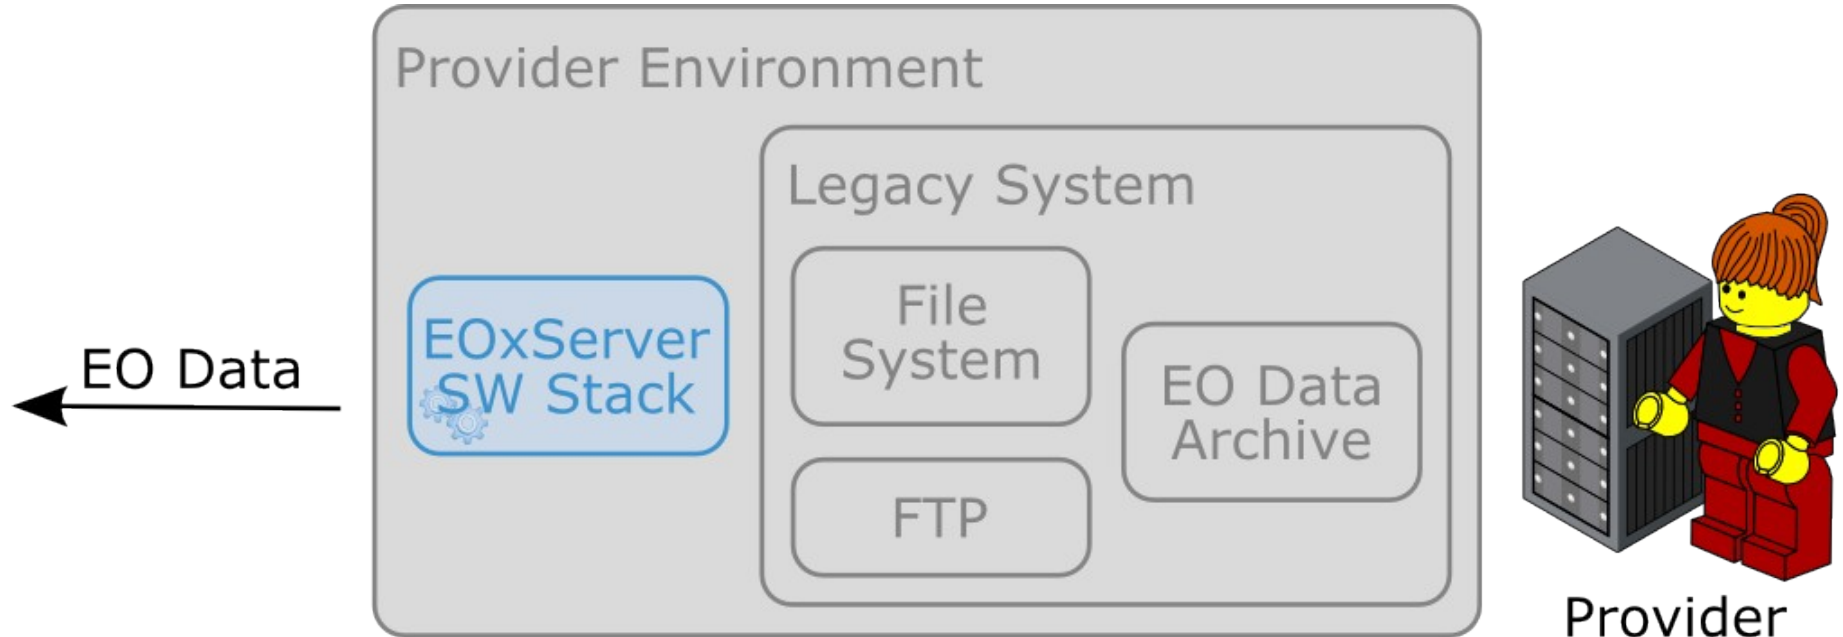

- Date:
-
- Min X: Max X:
- Min Y: Max Y:
-

EO-W*S Client – Download full

The screenshot displays the EOxServer web interface. On the left, there is a vertical sidebar with navigation icons and a list of three satellite images. Each image has a status bar at the bottom: '541 x 449 pixels 712.8 KB 59%' and a page indicator (1/3, 2/3, 3/3). The main area shows a satellite map of Europe with a red bounding box drawn over it. A dialog box titled 'EOxServer' is overlaid on the map. The dialog box contains a 'Date:' field with a calendar icon and a 'Download' button. Below this are three tabs: 'Date/Time', 'Bounding Box', and 'Help'. The 'Bounding Box' tab is active, showing four input fields: 'Min X:', 'Max X:', 'Min Y:', and 'Max Y:'. Below these fields are two buttons: 'Draw BBOX' and 'Clear BBOX'. In the bottom right corner of the map area, there is a 'Permalink' link with the URL '5.05737, 40.24210'.

Reference Implementation

Reference Implementation

- MapServer 6.0
 - WCS 2.0.0 via KVP & XML/POST
 - Anticipating future extensions (CRS, Scaling & Interpolation, Band subsetting, Encodings)
- EOxServer
 - EO-WCS 1.0.0 & EO-WMS on top of MapServer
 - Release 0.2 soon
- SOAP Proxy
 - Proxy to add XML/SOAP for WCS & EO-WCS

Reference Implementation

EOxServer Highlights

EOxServer

- MIT-style license and based on Open Source SW
- Rectified- and ReferenceableGridCoverages
- DatasetSeries and StitchedMosaics
- WCS Transactional (WCS-T)
- Integration with security system
- Data registration via admin gui or command line
- Simple client demonstrating integrated usage of EO-WMS & EO-WCS

EOxServer Open Source SW

Welcome to the EOxServer Open Source Project

EOxServer is a server for Earth Observation (EO) data

EOxServer implements the [OGC](#) Implementation Specifications EO-WCS and EO-WMS on top of [MapServer's](#) [WCS](#) and [WMS](#) implementations.

EOxServer is released under the [EOxServer Open License](#) a MIT-style license and written in [Python](#) and entirely based on Open Source software including [MapServer](#), [Django](#), [GDAL](#), [Spatialite](#), or [PostGIS](#), and [PROJ.4](#). Versions 0.1.x are released under the GNU General Public License.

[Download EOxServer](#)

[EOxServer Demonstration](#)

The currently available functionality includes:

- Support of GML AP – Coverages for RectifiedGridCoverages
- Support of adopted WCS 2.0 specification (Core including GetCapabilities, DescribeCoverage, and GetCoverage requests, KVP-, and XML/POST protocol binding)
- Anticipated support of envis "anticipating" we mean to r
- Support of 2-D EO Coverage
- Support of Dataset Series a
- Support of new DescribeEO
- Support of Stitched Mosaic
- Support of EO Metadata (re
- Protocol bindings supported
 - KVP
 - XML/POST (used toge
- Coverage formats supported
 - GeoTIFF
 - Formats supported by
- Support of EO-WMS for EO

Global Use Case

This section describes the global Use Case of EOxServer including concrete usage scenarios as examples.

Figure: "Parties involved in the EOxServer Global Use Case" introduces the involved parties in this global U

Parties involved in the EOxServer Global Use Case

On the one side there is a provider of Earth Observation (EO) data. The provider has a possibly huge, in size, archive of EO data and wants to provide this data to users. Of course the data provision has constraints and requirements like technical, managerial, or security frame conditions but in general the reach as many users as possible with minimal efforts.

History

EOxServer is a server for Earth Observation (EO) data

EOxServer implements the OGC Implementation Specifications EO-WCS and EO-WMS on top of MapServer's WCS and WMS implementations.

EOxServer is released under the EOxServer Open License a MIT-style license and written in Python and entirely based on Open Source software including MapServer, Django, GDAL, SpatialLite, or PostGIS, and PROJ.4.

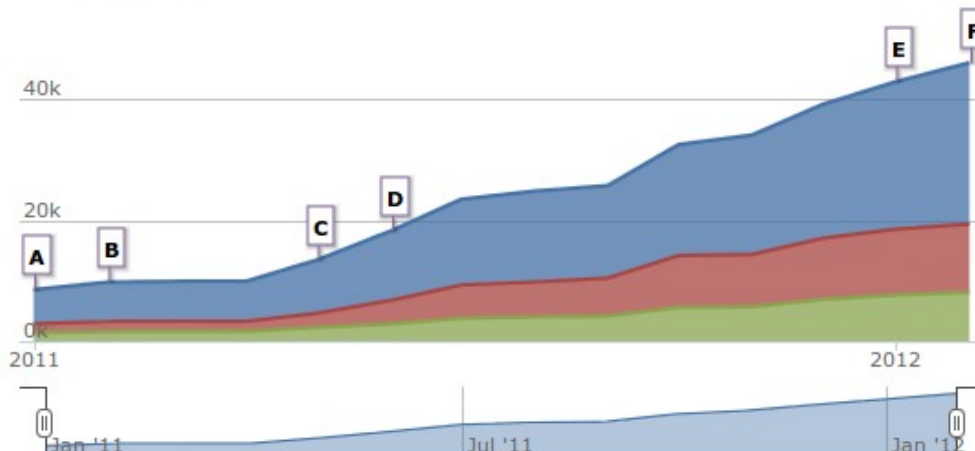

This project is managed by [Stephan Meissl](#).
