Erdbeobachtungsdaten

EO-WCS

- EO Coverages
 - **Rectified- oder Reference-ableGridCoverages** plus EO Metadata (Aufnahmezeitpunkt, Footprint, etc.)
 - **Dataset**
 - **StitchedMosaic** –
homogene Gruppierung
 - **DatasetSeries** – heterogene Gruppierung
 - **DescribeEOCoverageSet** Operation –
zeitliche und räumliche Suche der Metadaten

Welcome to the EOxServer Open Source Project

EOxServer is a server for Earth Observation (EO) data

EOxServer implements the [OGC](#) Implementation Specifications EO-WCS and EO-WMS on top of [MapServer's](#) [WCS](#) and [WMS](#) implementations.

EOxServer is released under the [EOxServer Open License](#) a MIT-style license and written in [Python](#) and entirely based on Open Source software including [MapServer](#), [Django](#), [GDAL](#), [Spatialite](#), or [PostGIS](#), and [PROJ.4](#). Versions 0.1.x are released under the GNU General Public License.

The currently available functionality includes:

- Support of GML AP – Coverages for RectifiedGridCoverages
- Support of adopted WCS 2.0 specification (Core including GetCapabilities, DescribeCoverage, and GetCoverage requests, KVP-, and XML/POST protocol binding)
- Anticipated support of envis "anticipating" we mean to r
- Support of 2-D EO Coverage
- Support of Dataset Series a
- Support of new DescribeEO
- Support of Stitched Mosaic
- Support of EO Metadata (re
- Protocol bindings supported
 - KVP
 - XML/POST (used toge
- Coverage formats supported
 - GeoTIFF
 - Formats supported by
- Support of EO-WMS for EO

Global Use Case

This section describes the global Use Case of EOxServer including concrete usage scenarios as examples.

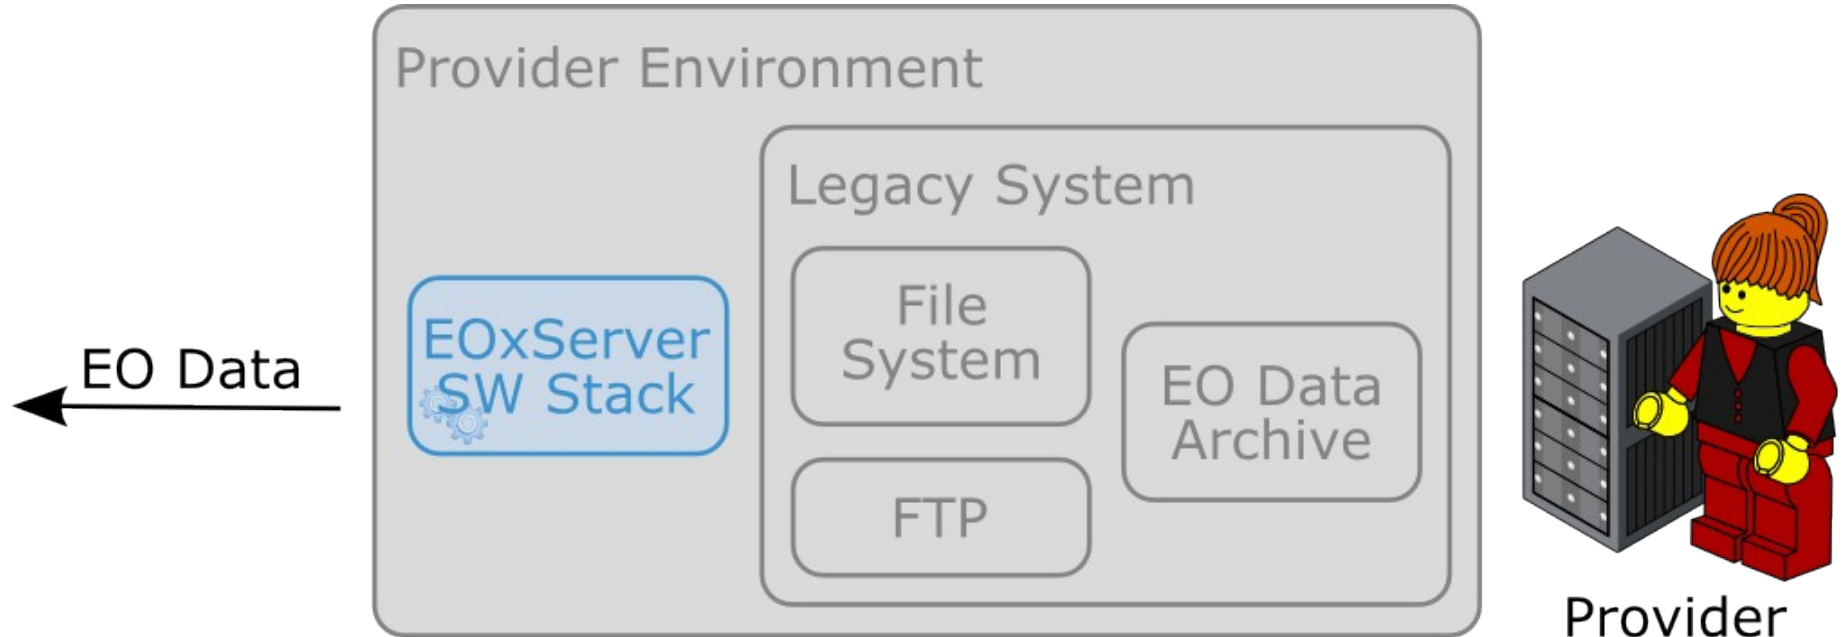

Figure: "Parties involved in the EOxServer Global Use Case" introduces the involved parties in this global U

Parties involved in the EOxServer Global Use Case

On the one side there is a provider of Earth Observation (EO) data. The provider has a possibly huge, in size, archive of EO data and wants to provide this data to users. Of course the data provision has constraints and requirements like technical, managerial, or security frame conditions but in general the reach as many users as possible with minimal efforts.

EOxServer

EOxServer Open Source SW

...

EOxServer

- MIT-style license
- Rectified- und ReferenceableGridCoverages
- DatasetSeries und StitchedMosaics
- WCS Transactional (WCS-T)
- Integration mit Authentifizierungssystem
- Registrierung von Daten via GUI oder Command Line
- Client (integrierte Verwendung von EO-WMS & EO-WCS)

Earth Server

- “Big Earth Data Analytics”
- EU FP7-INFRA Projekt 283610
- Projektlaufzeit: 3 Jahre
- Beginn: September 2011

<http://earthserver.eu>

Earth Server

- Mission: Standardisierte ad-hoc Analysen für Geowissenschaften via Web
- Skalierbar (> TB)
- Idee: Abfragesprache für Coverage Daten
- Ziel: OGC Standards, Client & Server Technologie

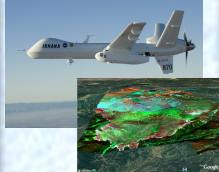

Earth Server

Lighthouse Applications

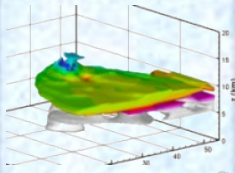

Cryospheric Science
landcover mapping

Airborne Science
high-altitude long-endurance drones

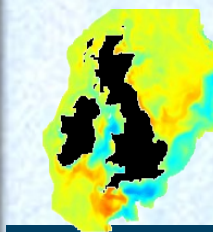

Atmospheric Science
climate variables

Geology
geological models

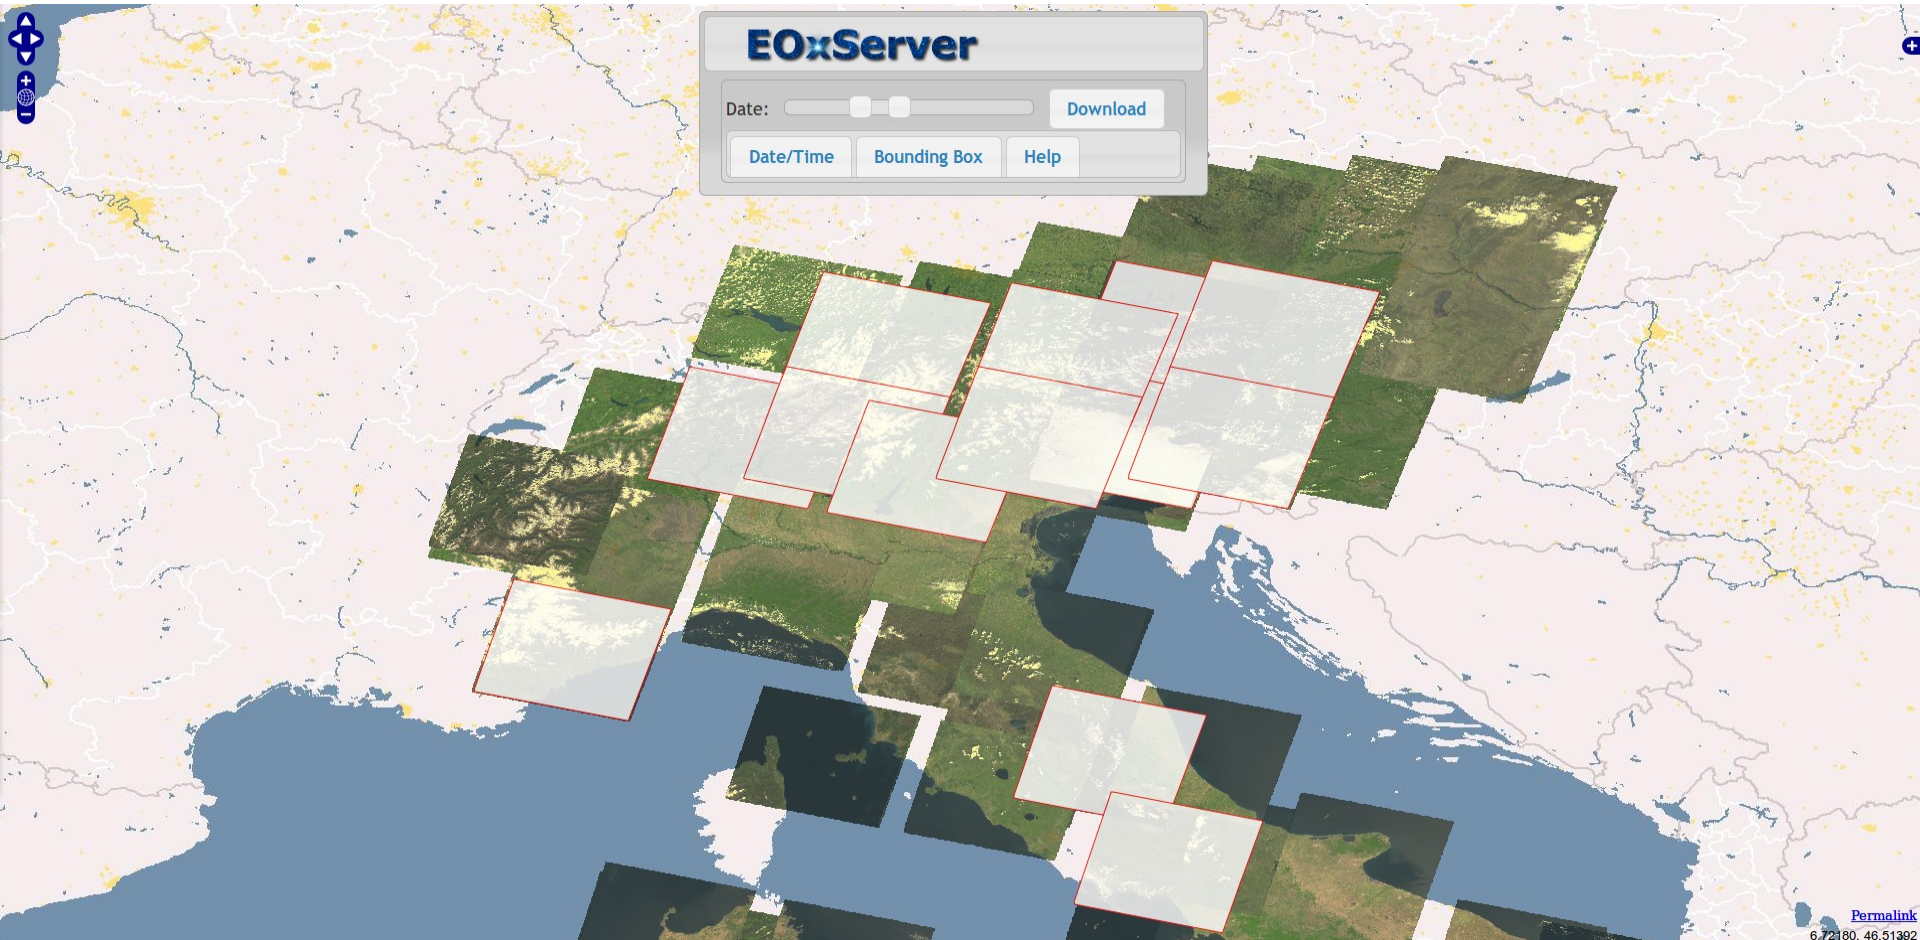

Oceanography
marine model runs + in-situ data

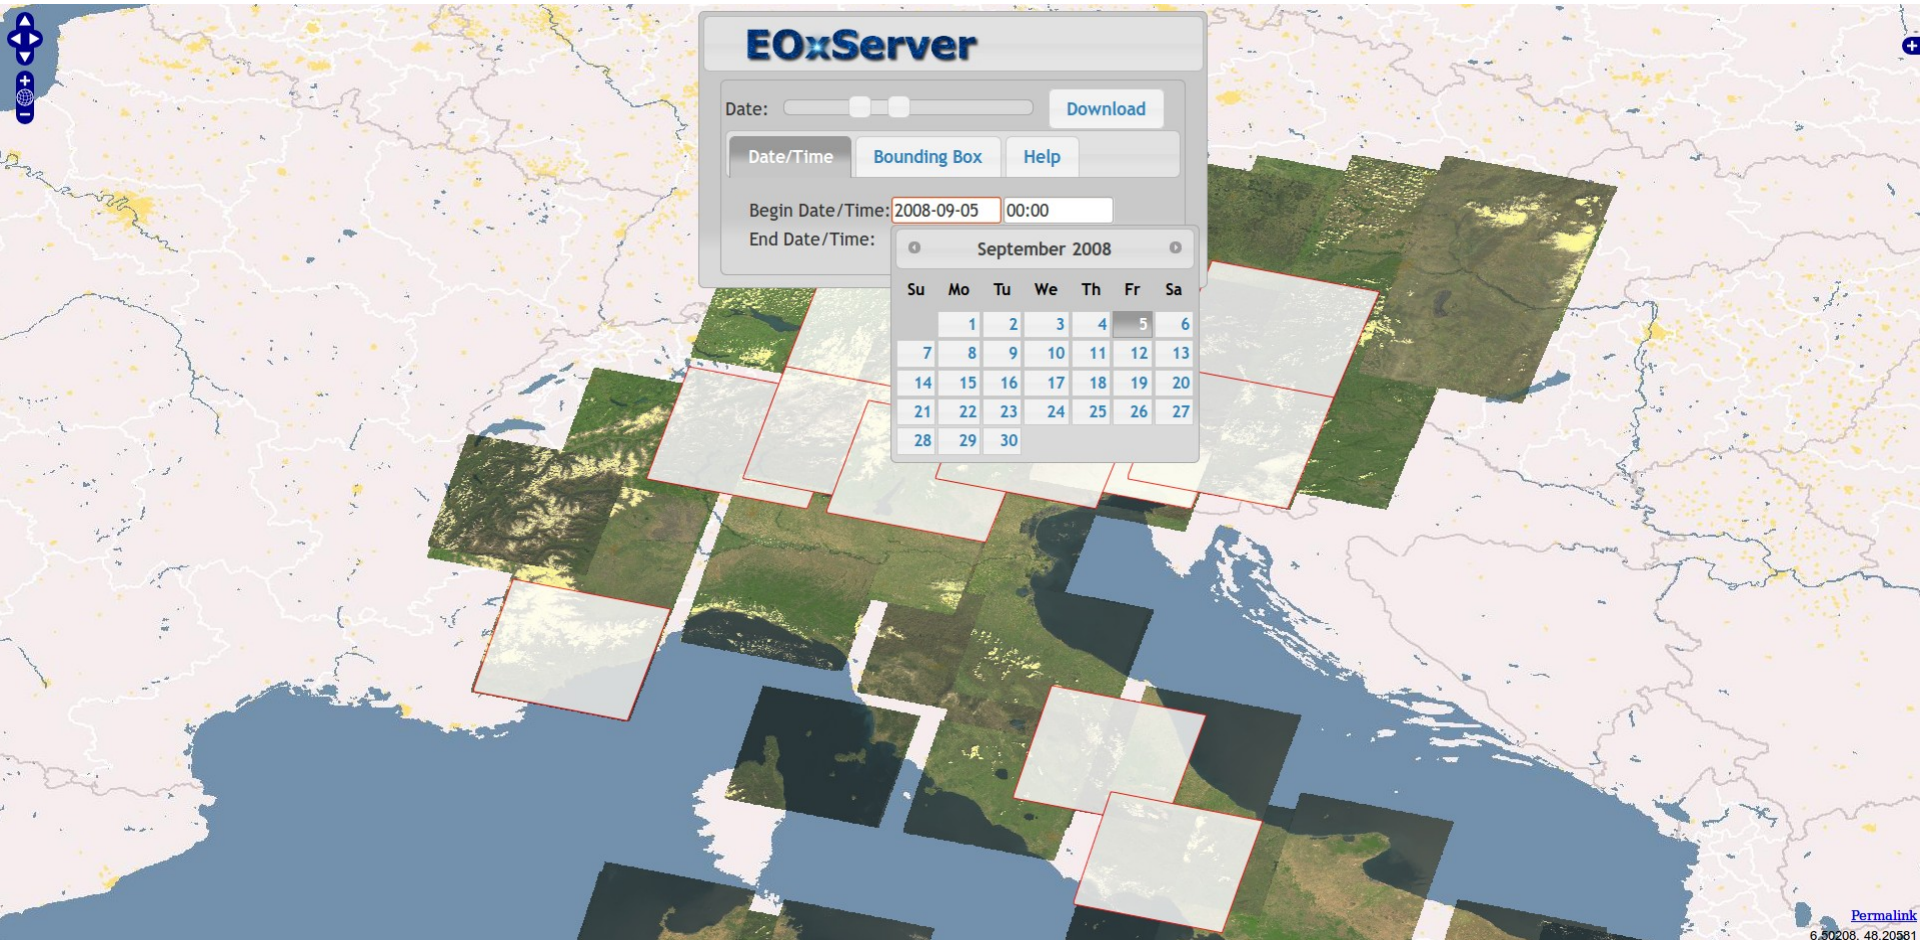

Planetary Science
Mars geology
